

FINGER GRIP

MIRALIS

THOSE WHO APPRECIATE PURE LINES AND MINIMALIST DESIGNS WILL DEFINITELY BE SEDUCED BY THE FINGER GRIP

A handleless, linear and minimalist kitchen concept, that's what the Finger Grip is all about.

The combination of a contemporary design with an intuitive look. The unique configuration of the door and the space between the front panels allow you to slide your fingertips for an ergonomic grip that is second to none.

SF116-M White Lace

SA350-M Northern Floe

SF119-M Black Satin

IMPORTANT

So here is the Finger Grip brochure, your perfect guide to making a dream kitchen come true in perfect harmony. Being a concept in its own right, the Finger Grip must be selected at the very beginning of the process since the cabinets and hardware are specifically adapted to it. Moreover, with its contemporary appearance, it is an obvious match for the SLAB one-piece door.

Note: With the exception of the upper cabinets, the connecting part behind the doors must be affixed to the cabinet in the specially cut grooves. Your installer will have to cut the bar then attach it to the cabinets afterwards.

B1D-FG

BASE
1 DRAWER
FINGER GRIP

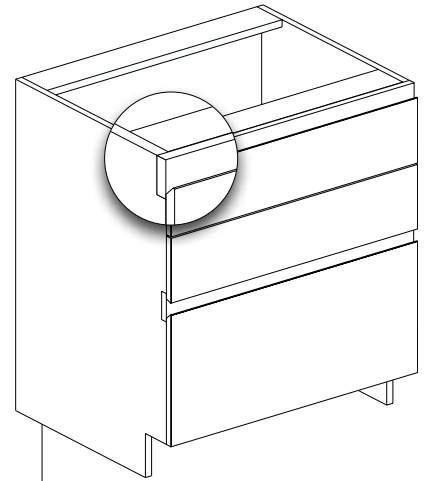

- Increase storage space by adding a roll-out shelf above the drawer.

B2D-FG

BASE
2 DRAWER
FINGER GRIP

- The two drawer fronts are the same height.
- Increase storage space by adding a roll-out shelf above each drawer.

B3D-FG

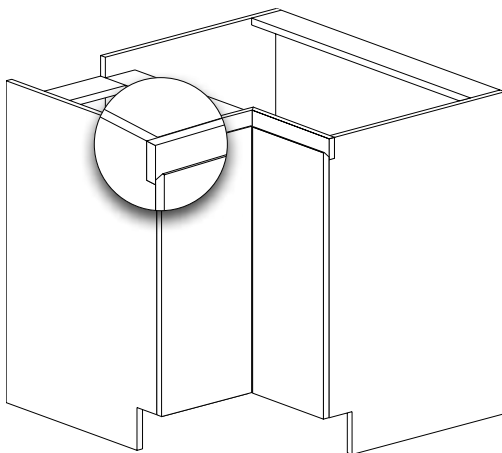

BASE
3 DRAWER
FINGER GRIP

- The two upper-drawer fronts are the same height.
- The two upper-drawer fronts are the same height as the bottom-drawer front.
- Increase storage space by adding a roll-out shelf above the lower drawer.

IMPORTANT

- The Finger Grip is **placed in the upper or the middle of the unit.**
- There is **always** a Finger Grip at the top of a base cabinet.
- Access space between fronts is **1 3/8"**.
- **Concealed dishwasher?**
It must be set back 2 1/4" under the counter.

BASE CORNERS

BC-FG

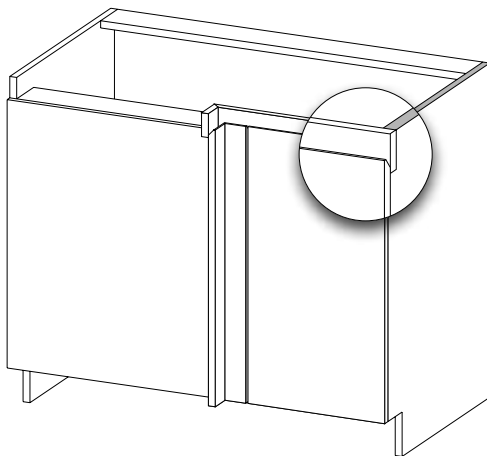

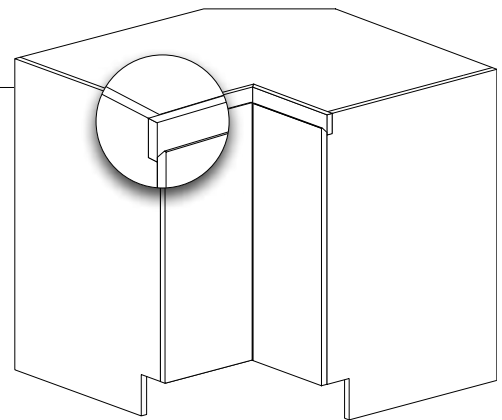

BASE CORNER FINGER GRIP

- A Lazy Susan can be added for easy access to the cabinet interior.
- This cabinet is shipped in two sections.

BBC-FG

BASE BACK CORNER FINGER GRIP

- A Lazy Susan can be added for easy access to the cabinet interior.

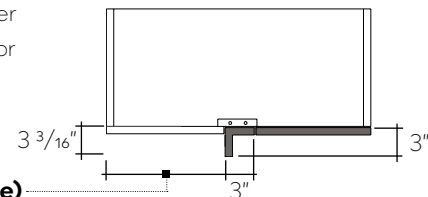

BBC_F-FG

BASE BLIND CORNER FINGER GRIP

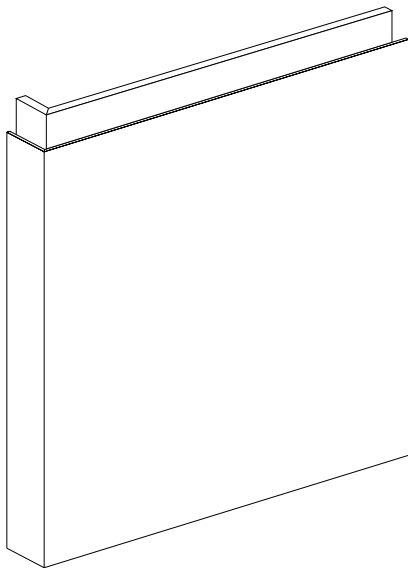

- The default width of the blind corner panel is equal to the depth of the cabinet.
- For a perfect finish, a 3" x 3" corner filler is installed between the door and the blind corner panel.

- The blind corner comes unfinished.

Width of the blind corner (variable)

BOX FILLERS

BBFL-FG

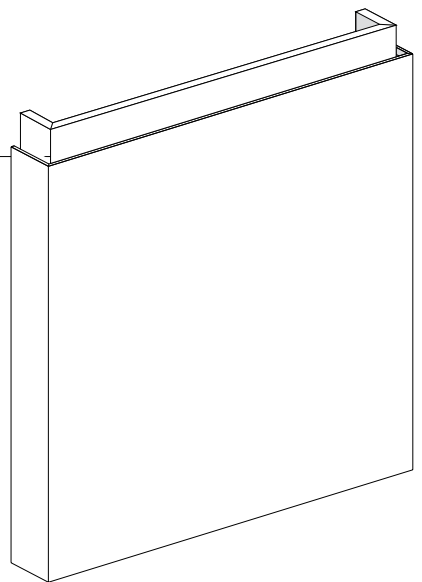

BASE BOX FILLER TYPE L FINGER GRIP

- Designed for the Finger Grip to continue around the cabinet side.
- All box fillers are 3" thick.
- The box filler is made of the same material as the doors.

BBFC-FG

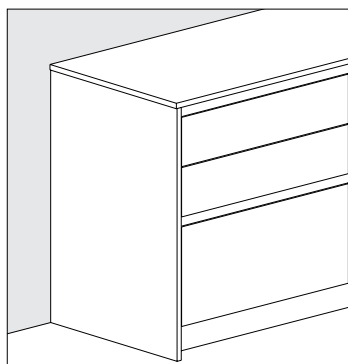

BASE BOX FILLER TYPE C FINGER GRIP

- Designed for the Finger Grip to continue around the cabinet side and back.
- All box fillers are 3" thick.
- The box filler is made of the same material as the doors you order.

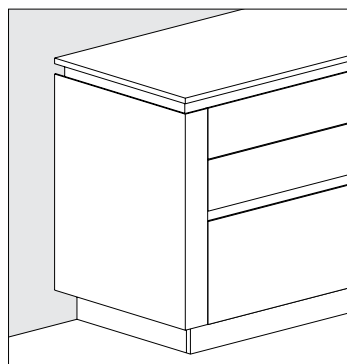

IMPORTANT

- The side, the front, the top and bottom come finished.

WALL CABINETS

W-FR

WALL FRIDGE

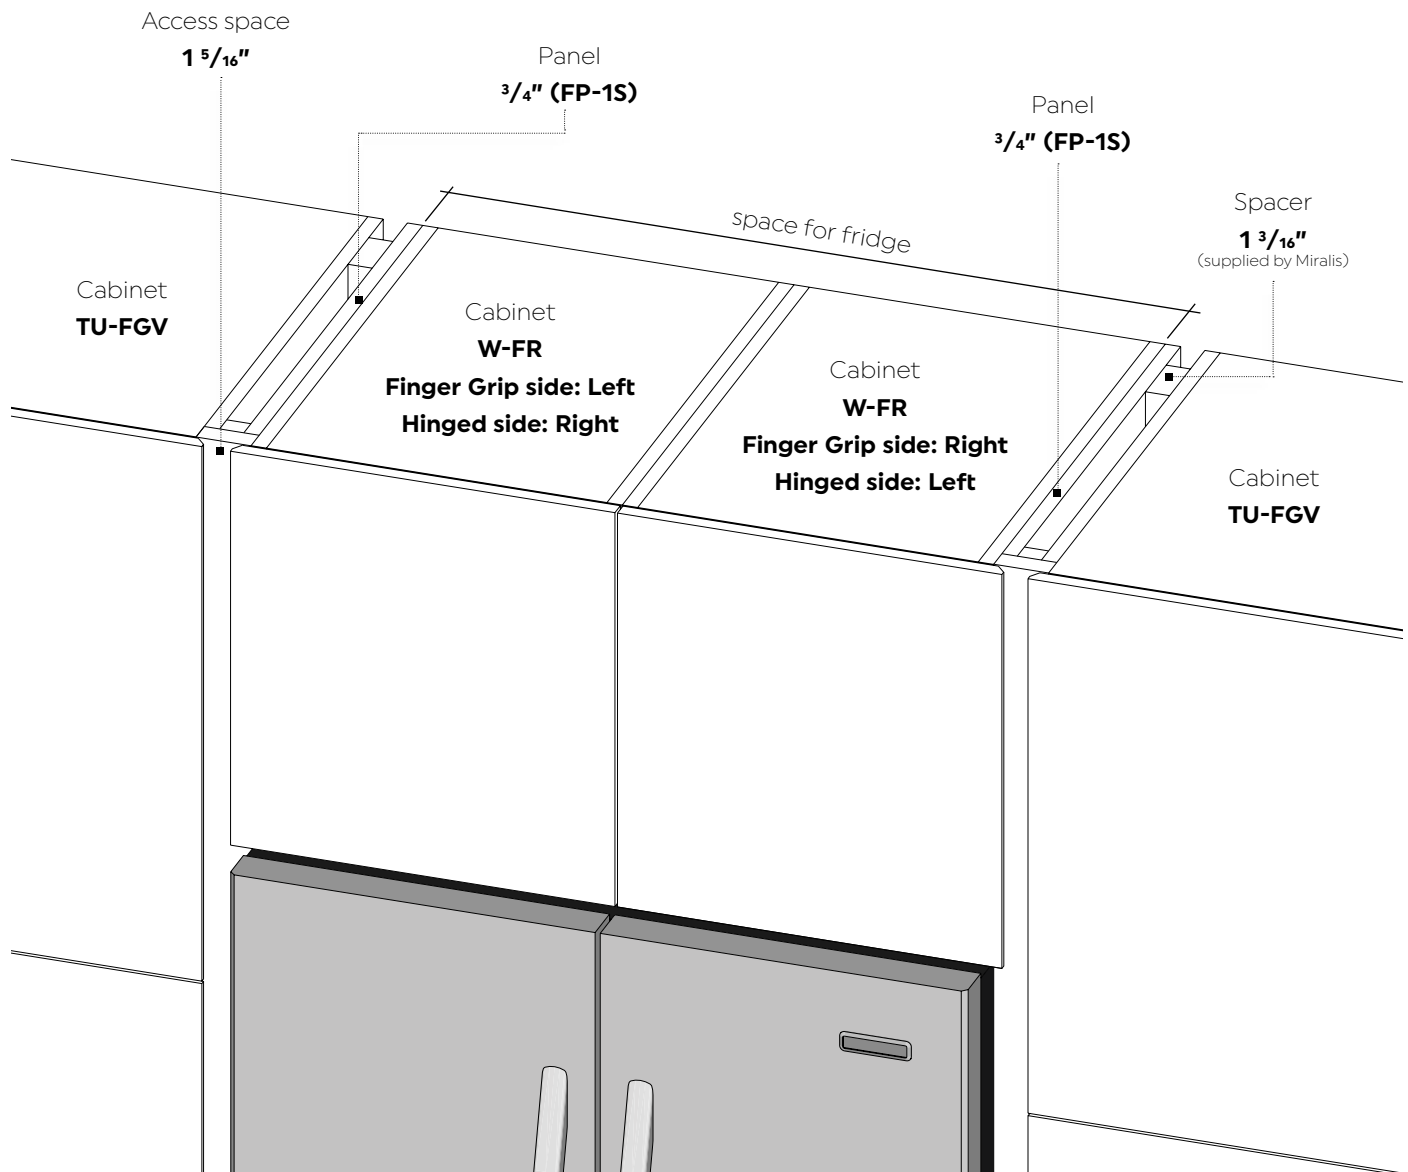

- Use above refrigerator.
- Fridge Wall units are only available 1-door wide.
- Indicate the side(s) with the vertical Finger Grip. The cabinet door will be extended to allow the fridge door to be opened.
- See page 21 for more complete specifications.

SPECIFICATIONS

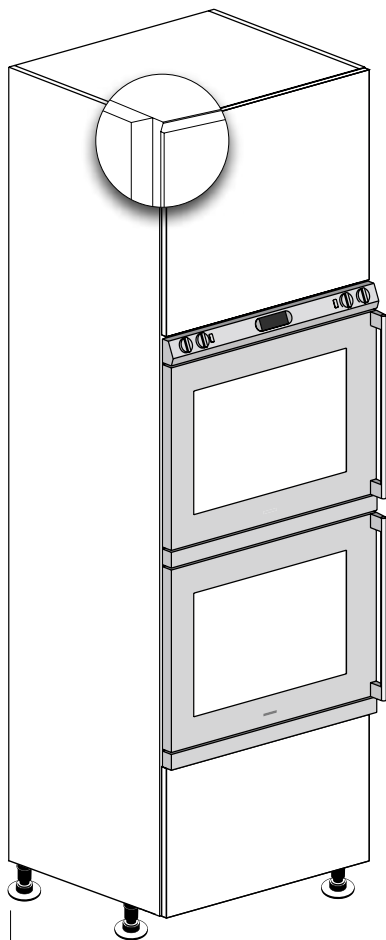

REFRIGERATOR SPECIFICATIONS

- When a vertical Finger Grip notch is on the side of a refrigerator, a full-height panel (FP-1S) must be installed. Allow for a front setback of 3/4" for the vertical Finger Grip notch.
- The width of the unit placed above the refrigerator will dictate the space remaining for the fridge.
- Use a Fridge Wall unit (W-FR) above the refrigerator.
- The Fridge Wall unit (W-FR) is only available one-door wide. The door can open to the left, the right or upwards, depending on the mechanism chosen.
- The door of the Wall Fridge (W-FR) will need to have a 3/4" extension, which would allow it to fit over the Finger Grip.
- For a completely concealed refrigerator, the width of the door is calculated as follows:

$$\text{Door width} = \text{Width of space} - \frac{1}{8}" + (\frac{3}{4}" \times \text{number of vertical Finger Grip})$$

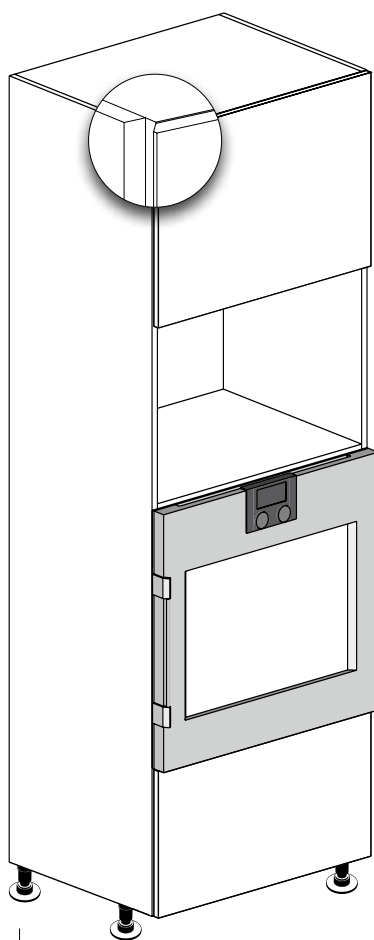

OVEN CABINETS

OC1D-FGV **OVEN CABINET** **1 DRAWER**

- Please indicate the side(s) on which the vertical Finger Grip will be installed.
- Opening unfinished by default.

OC2O1D-FGV **OVEN CABINET** **2 OVENS** **1 DRAWER**

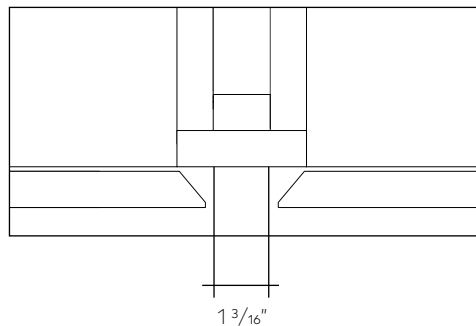

- Please indicate the side(s) on which the vertical Finger Grip will be installed.
- Opening unfinished by default.

IMPORTANT

- Sides with vertical Finger Grip are **always manufactured with $\frac{3}{4}$ " thick material.**
Important if you need to calculate the interior space of an oven cabinet.
- There must be **$1\frac{3}{16}$ " allowed between units** for each vertical Finger Grip.
- Vertical Finger Grip is available with a **single** or **double grip**:

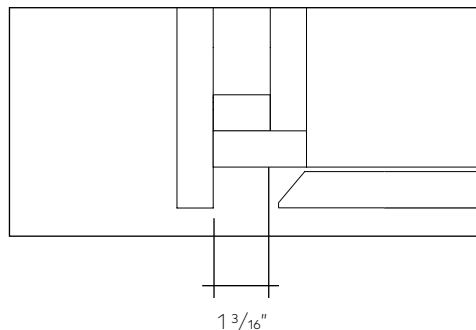

DOUBLE GRIP

Used between two cabinets.

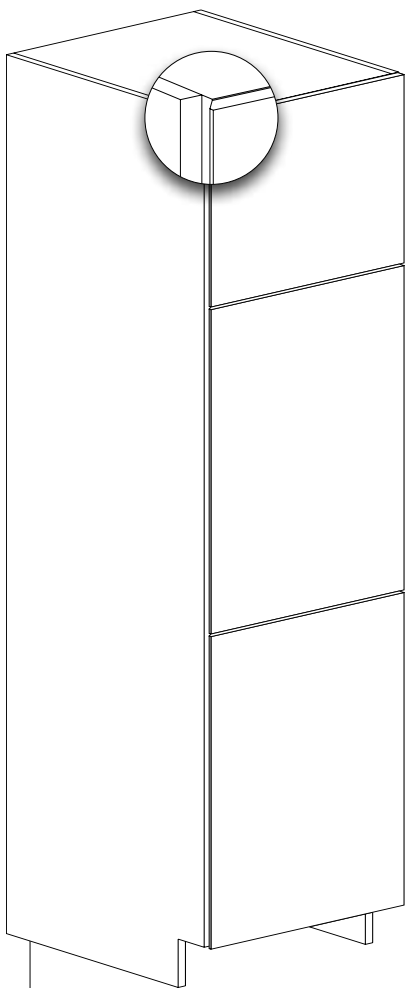

SINGLE GRIP

Used at the ends.

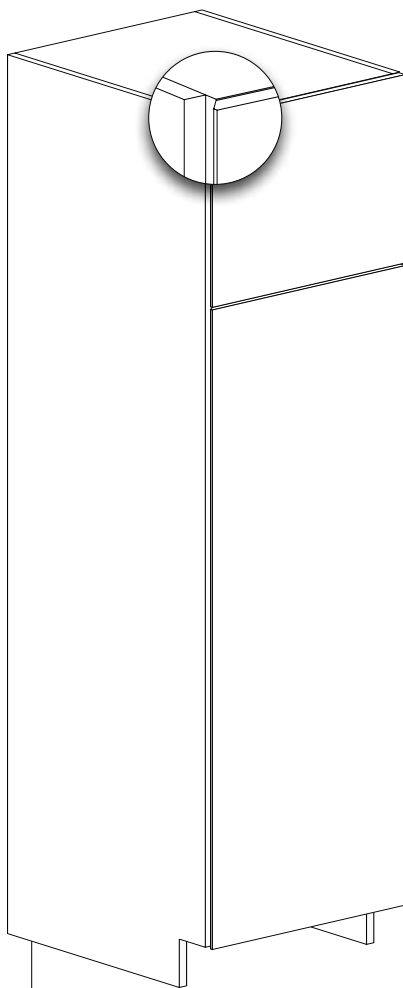

- Tall and oven cabinets are **only available in a one-door width.**

PANTRY

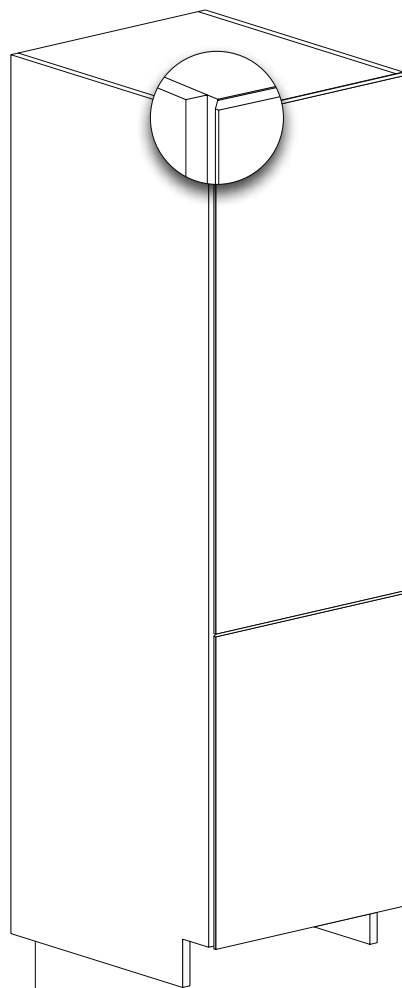

TU-FGV **TALL UTILITY** **FINGER GRIP** **VERTICAL**

- Please indicate the side(s) on which the vertical Finger Grip will be installed.

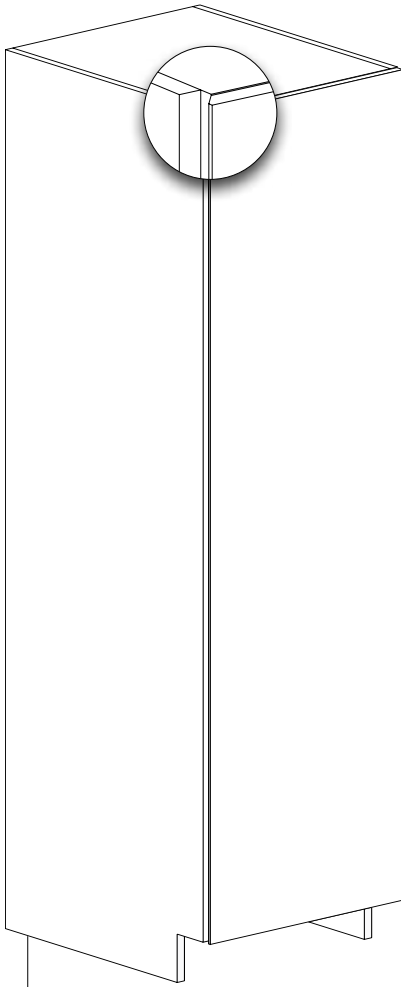

TUH-FGV **TALL UTILITY** **TYPE H** **FINGER GRIP** **VERTICAL**

- Please indicate the side(s) on which the vertical Finger Grip will be installed.

TUG-FGV **TALL UTILITY** **TYPE G** **FINGER GRIP** **VERTICAL**

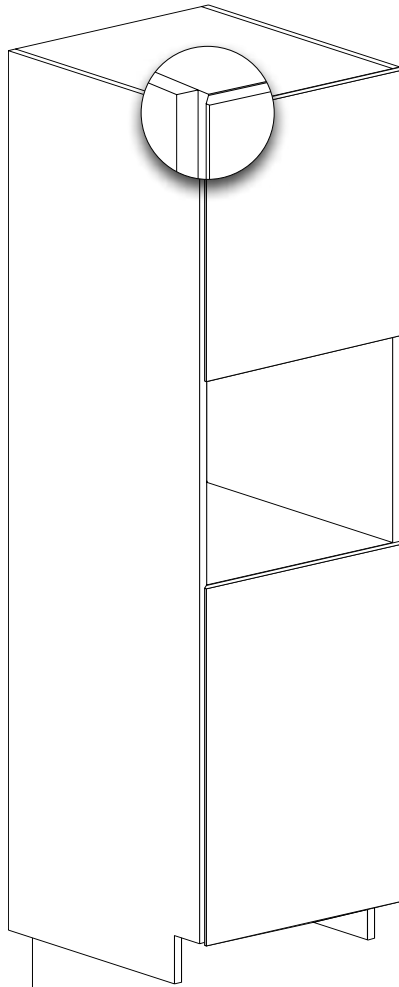

- Please indicate the side(s) on which the vertical Finger Grip will be installed.

TUF-FGV

**TALL UTILITY
FULL-HEIGHT
FINGER GRIP
VERTICAL**

- Please indicate the side(s) on which the vertical Finger Grip will be installed.

TUOSMDTB-FGV

**TALL UTILITY
MIDDLE OPEN
SHELVES TOP AND
BOTTOM DOOR
FINGER GRIP
VERTICAL**

- Please indicate the side(s) on which the vertical Finger Grip will be installed.
- The interior of the cabinet comes finished.

FINGER GRIP MOULDING SPECIFICATIONS

- Available on all Miralis materials, without exception.
- The length of the molding depends on the selected material.
