For a durable and timeless kitchen, choose materials that suit your needs and lifestyle.

Laminate	European Laminate	Similacquer
<p>Laminate, a high-end melamine, is made of a coloured sheet impregnated with a protective layer, called resin, which is fused to a pressed wood panel. Easily mistaken for real wood, it allows you to build a kitchen with a natural and realistic finish.</p> <ul style="list-style-type: none">• Imitates various natural wood veneers.• Vertical alignment of the wood grain in the same cabinet only.• High quality and very durable.• Neolaminate: Surpassing traditional laminates, it replicates natural wood with unparalleled fidelity. <p> Some finishes are less fingerprint-resistant than others.</p>	<p>This rich and durable material, compared to standard laminate, resembles real wood even more. In fact, with cabinet interiors and doors that seamlessly take on the same texture, we can easily be led to think that European laminate built-ins are made just like kitchen furniture of the highest quality wood.</p> <ul style="list-style-type: none">• Imitates a variety of authentic, natural woods.• Vertical alignment of the wood grain in the same cabinet only.• The cabinet interior is matched to the doors.• High quality and very durable.	<p>Similacquer is manufactured using a cutting-edge technology that fuses the materials. A similacquer film is permanently glued to a wood panel. The supermatte finish is an excellent imitation of lacquer and has many of the technical advantages of engineered products.</p> <ul style="list-style-type: none">• The supermatte finish is an excellent imitation of lacquer at a lower cost.• Humidity resistant.• No colour fading and UV resistant.• Has many of the technical advantages of engineered products. <p> Family approved: a durable, easy-to-clean product.</p>

Advanced Engineering

Lacquer

Wood

<p>Considered the strongest material in the industry. Composed of sheets impregnated with thermosetting resins, submitted to a heat pressing process. The surface is then permanently attached to a pressed wood panel. Used vertically or on a flat work surface, they allow for flawless uniformity and continuity of material in a kitchen. This material provide peace of mind when it comes to maintenance and longevity.</p>				<p>Simple and elegant, this material shines with versatility. Its wide range of solid colours and varied choice of door models offer endless combinations, all equally refined and eye-catching. The lacquer is applied to a pressed wood panel.</p>	<p>Wood veneer or hardwood? Veneer is a sheet of natural wood glued to a panel of pressed wood. Hardwood is 100% real wood. Each piece of wood is unique; each has its distinctive character. Wood is a good choice if you like the natural variations in colour and wood grain from one door to another.</p>
<ul style="list-style-type: none"> • Scratch, abrasion, heat, moisture and light resistant. • Can be used as a countertop. • Fingerprint resistant. • Easy maintenance. • FENIX: Micro-scratches can be repaired using heat. • Engineered wood: its strength is equivalent to the engineered wood used for wooden flooring. 				<ul style="list-style-type: none"> • Wide choice of colours and finishes. • Various door models. • Custom colours are offered. • Smooth and uniform texture. 	<ul style="list-style-type: none"> • Wide range of wood species and finishes. • Several door styles available. • Systematic alignment of the wood grain. • Solid – Customization options • Veneer – Better moisture stability than solid wood
 Family approved: a durable, easy-to-clean product.				 The lacquer may change colour over time, and the finish may flake off when subjected to impact.	 May change colour slightly over time when frequently exposed to light. Some species vary more than others. The lacquer may change colour over time, and the finish may flake off when subjected to impact.

Door models manufactured by Miralis

- Fused-edge banding
- Each product is tested using Miralis' patented method

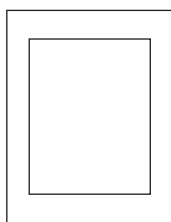

3 MAIN CATEGORIES:

Slab

Tribeca

Shaker

Handleless never gets old.

Our inclination for timelessness has led us to offer three concepts of handleless cabinets..

- Finger grip • C Channel • Push to open

A handleless design has some key benefits:

- A timeless design
- A kitchen with clean lines
- Easy to clean

Durable inside and out

Cabinets

- Default ¾-inch construction.
- Linen finish cabinet interiors
- Easy maintenance.
- Designed to withstand weight and friction.

Drawers

Drawer box :

- Blum Legrabox in metal
- Hardwood dovetail
- Walnut dovetail

Slide-out drawers :

- Default glass front.
- Full extension slide.
- Smooth closing.

Hardware

- Tricky-to-install hardware is already installed in the cabinet.
- Factory-installed items are inspected and tested prior to shipping.
- Save time during installation.

The Curio

Unique to Miralis, the Curio is perfect for displaying your treasures and infusing character into your living space.

The starring role in your home

- Custom-made
- Integrated LED lighting
 - Strategically built into each shelf to avoid glare
 - The LEDs ensure uniform light.
- Concealed hinges
- Built-in or made as a stand-alone piece
- Wide choice of materials
