## Embrace the glow.

For us, innovation must first and foremost be sustainable. With this in mind, all our new products are created. Discover what sets the M02 collection apart.

At the intersection of timeless design and cutting-edge engineering, this collection stands out with its minimalist, sleek lines. Its signature addition: integrated LED lighting in cabinets and drawers, becoming an indispensable feature. Undoubtedly, it's a brilliant choice.

This collection was born from extensive research conducted around the world. Its materials are as technologically advanced as they are timeless, offering sleek finishes with rich textures - Laminate, Similacque, High Engineering.

Its uniform doors, free of unnecessary adornments, will stand the test of time with their owners. Purely and simply.

Just like the cabinets, drawers are central to the design, efficiency, and even the beauty of a room. Because every detail counts, we've carefully selected the drawer for this new collection. Our new Vionaro V8 Grass drawers, extremely durable, are designed to withstand weight and wear for years.

The M02 collection is proof that creativity, aesthetics, and environmental responsibility can coexist beautifully. But the thinking that enables us to achieve this is long-term and not taken lightly: it is a continuous search and a deep desire to challenge what was considered obvious just yesterday. Our engineers and designers work in synergy to push their art further, creating ever more sustainable products and more technologically advanced processes.

We are extremely proud to unveil the M02 collection, manufactured in our new highly automated factory.

Noémie Bernier  
Head of Product Innovation

# M02 Collection

## Key distinctions and features

This collection stands out with its minimalist and sleek lines, offering a range of finishes with rich and varied textures, such as laminate, similacquer, and advanced engineered materials. Its LED lighting, carefully integrated into the cabinets and Grass drawers, combines warmth, durability, and strength, ensuring a perfect blend of functionality and aesthetics.

# Key distinctions

## FOR DESIGN

- The edge banding is meticulously matched to the piece, ensuring a harmonious cabinet interior.
- We ensure a vertical alignment of the wood grain on each cabinet, up to a maximum length of 108".
- Cabinets over 84" will be designed in 2 or 3 sections to facilitate handling and installation.
- Conceptualized with applied panels. These not only simplify installation but also make repairs easier in case of water damage.

## CABINET SPECIFICITIES

- Each piece is finished on both sides to optimize the use of raw materials and ensure easy installation.
- Exclusive use of levelers. Facilitates installation and contributes to the protection of the cabinets.

Standard dimensions are revisited to optimize the interior space of the cabinets.

1. Toe kick height: 4 "

2. Cabinet depth: 24 "

**Please note that everything is modifiable and customizable in EM2.**

# Cabinets.

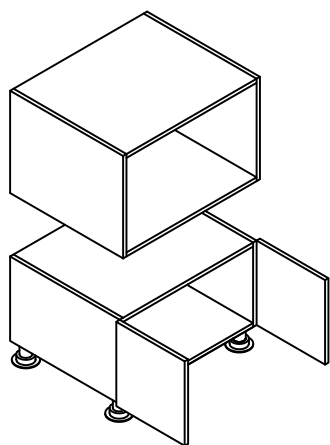

# A novelty.

## Modular cabinets

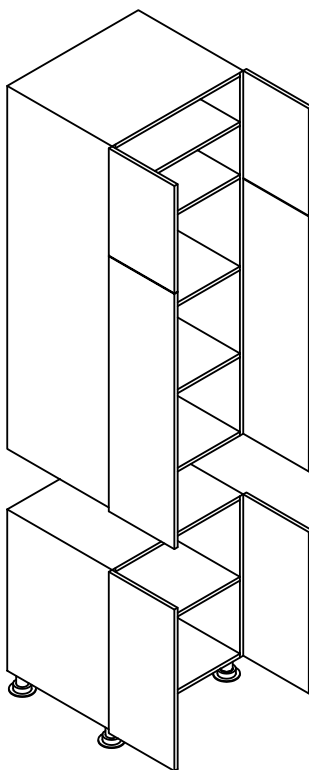

Modular cabinets are one of the features of the M02 collection. These are cabinets that are ordered with a single cabinet code whose suffix is MODU but are delivered in 2 or 3 sections to facilitate handling.

- All cabinets that have a height of more than 84 ", including levelers, will be delivered in multiple sections.
- Any cabinet that includes an open section will be produced in several sections. The open section will always have a depth equal to the doors of the cabinet.

Contemporary

Design - André Potvin, QC

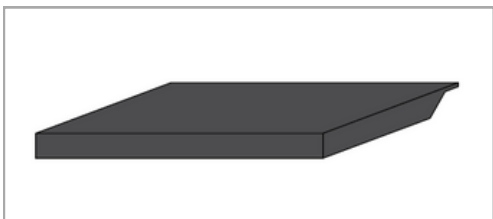

# Le Curio

Contemporary Curio

Glass shelf with  
aluminum frame

Finished shelf  $\frac{3}{4}$ " thick, made from  
the same material as the interior.

## DESCRIPTION

The distinctive feature of the contemporary Curio lies in its elegant black aluminum frame and invisible hinges, creating a sleek and modern design without handles.

## DOOR MODEL

- Pittsburgh GFALU-101
- Door with a 1-inch aluminum frame.

DIMENSION LIMITS	MIN.	MAX.
------------------	------	------

Width	8"	24"
Height	8"	84"

## SIDES

- Finished sides  $\frac{3}{4}$ " thick.
- Glass sides - Only available with glass shelves.

## COLORS

All materials from the M02 collection are available for your Curio.

## LIGHT

- Concealed LED strip at the back of each shelf.
- Circular integrated light on the ceiling of the cabinet.  
Available with glass shelves only in black or chrome

Luminescence.

# Luminescence

The Luminescence offering from Miralis revolutionizes kitchen lighting with an integrated LED solution designed to seamlessly fit a variety of elements, from cabinets to countertops and drawers.

## Advantages

- Quick and hassle-free installation: Each lighting component is integrated into the cabinets during manufacturing.
- Uniform and discreet lighting: Thanks to a silicone diffuser, the LED points are concealed, creating a continuous, soft, and uninterrupted lighting effect."
- Two light temperatures: a neutral option for bright and energizing lighting, and a warm option for a welcoming and cozy ambiance.
- Simplified connectivity: The electrical system is easily accessible and follows a plug & play approach, making installation and maintenance straightforward

## 3 LIGHTING OPTIONS AVAILABLE

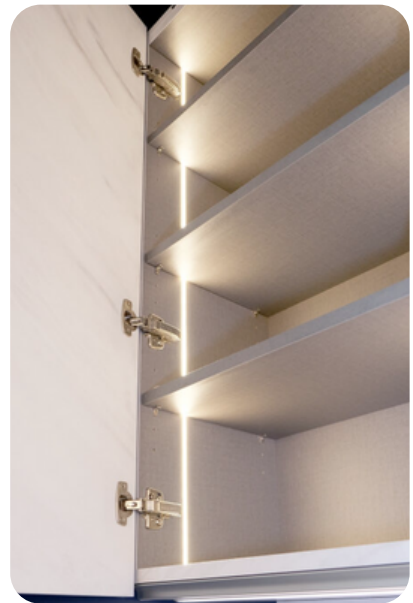

**OPTION 1**  
**Countertop lighting**

Panneau avec rondelle lumineuse intégrée.

**OPTION 2**  
**Inside lighting**

Inside an open or glass cabinet.

**OPTION 3**  
**Inside lighting**

Inside a closed cabinet.

# Luminescence

## OPTION 1 - COUNTERTOP LIGHTING

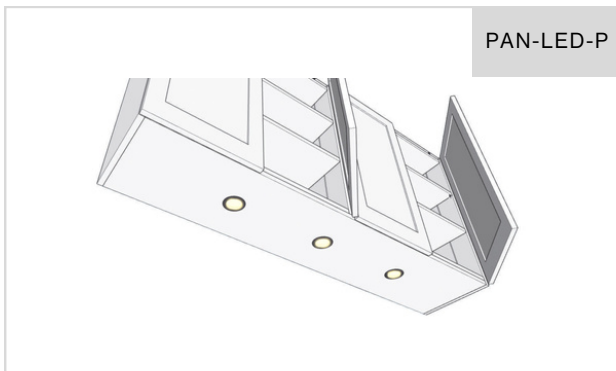

LED lights are integrated into a separate panel mounted beneath the upper cabinet to conceal the joints between adjacent cabinets and create a uniform appearance. There are 3 options available:

### 1. Panel with integrated puck lights:

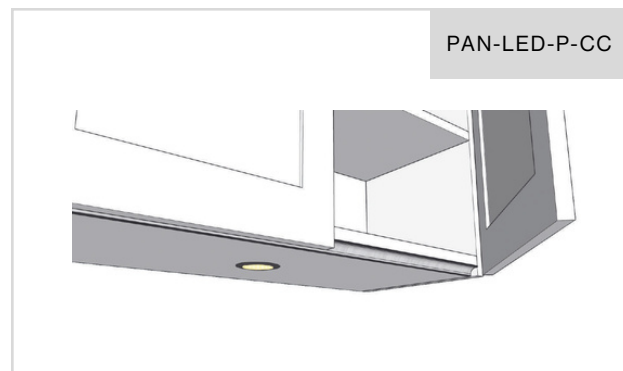

Puck lights are essential for upper cabinets in all kitchen styles.

Panel arrangement: Puck lights are evenly spaced based on the length and width of the panel.

- Upon request, the spacing of the puck lights can be customized.
- Beam shape: Triangular
- Control: Lighting should be controlled by a wall switch.

Panel with puck lights

Panel with C-channel profile molding

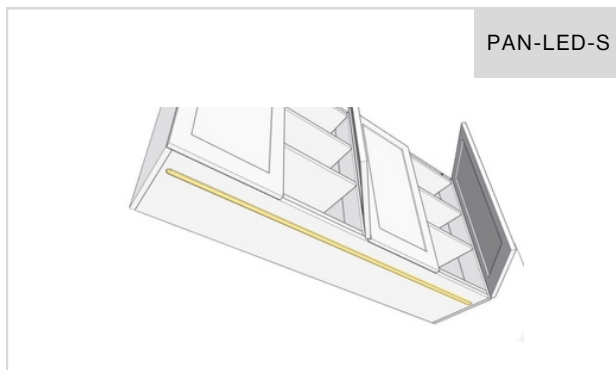

# Luminescence

## OPTION 1 - COUNTERTOP LIGHTING (CONTINUED)

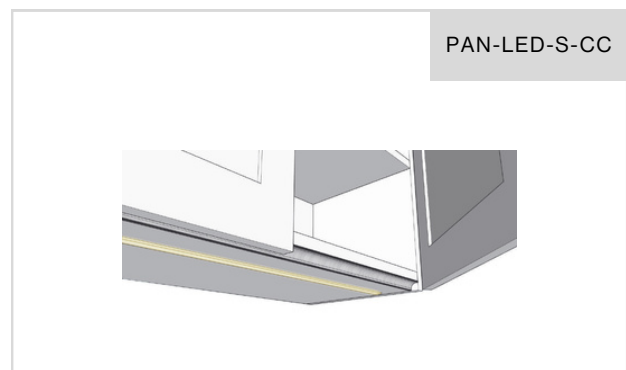

### 2. Panel with integrated light strip

The LED light strip is integrated into the panel. The panel is used to even out the underside of upper cabinets by concealing the joints between adjacent cabinets. It is particularly suitable for a contemporary design.

- Panel arrangement: The LED strip is installed 3" from the front of the panel and 1" from each side. Please note that it is also possible to choose a different position upon request.
- Limit: The maximum length of a light strip is 243.84 cm (96").
- Beam shape: Linear and uniform countertop lighting.
- Control: Lighting should be controlled by a wall switch.

Panel with LED light strip

Panel with C-channel profile molding

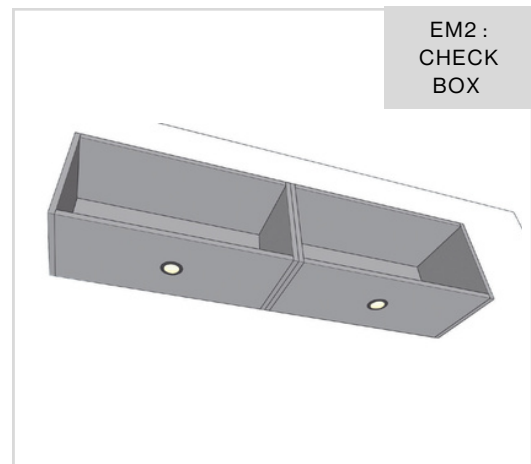

# Luminescence

## OPTION 1 - COUNTERTOP LIGHTING (CONTINUED)

### 3. Integrated puck light under an open cabinet

In the case of an open cabinet, adding a panel is not a desirable option for aesthetic reasons. We recommend recessing the LED puck lights directly into the upper cabinet.

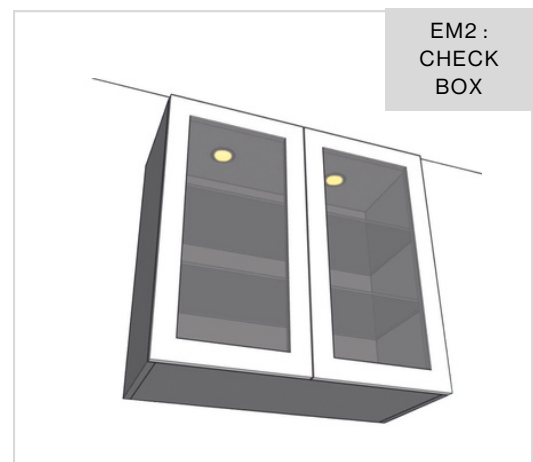

- Placement on the cabinet: The puck lights are recessed into the upper cabinet's bottom and positioned at the center of the cabinet.
- Beam shape: Triangular.
- Control: Lighting should be controlled by a wall switch.

## OPTION 2 - LIGHTING INSIDE AN OPEN OR GLASS CABINET

The light inside an open or glass cabinet illuminates the objects you want to showcase.

- Placement on the cabinet: The puck lights are centered with each of the doors.
- Limit: Only available in a cabinet without shelves or with glass shelves.
- Beam shape: Triangular.
- Control: Lighting should be controlled by a wall switch.

# Luminescence

## OPTION 3 | Lighting inside a closed cabinet

### 1.LIGHTING INSIDE A CLOSED CABINET

Lighting provided by a slim strip of recessed LED lights on the sides inside the cabinet is a particularly attractive option in a pantry as it meets a practical need.

- Placement inside the cabinet: By default, one LED light strip on the left and one on the right are installed 3 1/2 " from the front of the cabinet inside the pantry.
- Beam shape: Linear and uniform lighting.
- Control: Each door is connected to an automatic switch, which is always placed on the hinge side. The light gradually turns on when the door is opened.
- Switch position: Base cabinet: cabinet floor | Upper cabinet: cabinet ceiling.

### 2.LIGHTING BY LIGHT STRIP INSIDE A DRAWER

LED lighting inside drawers is a particularly appealing option for a vanity or kitchen drawers as it elegantly showcases their contents.

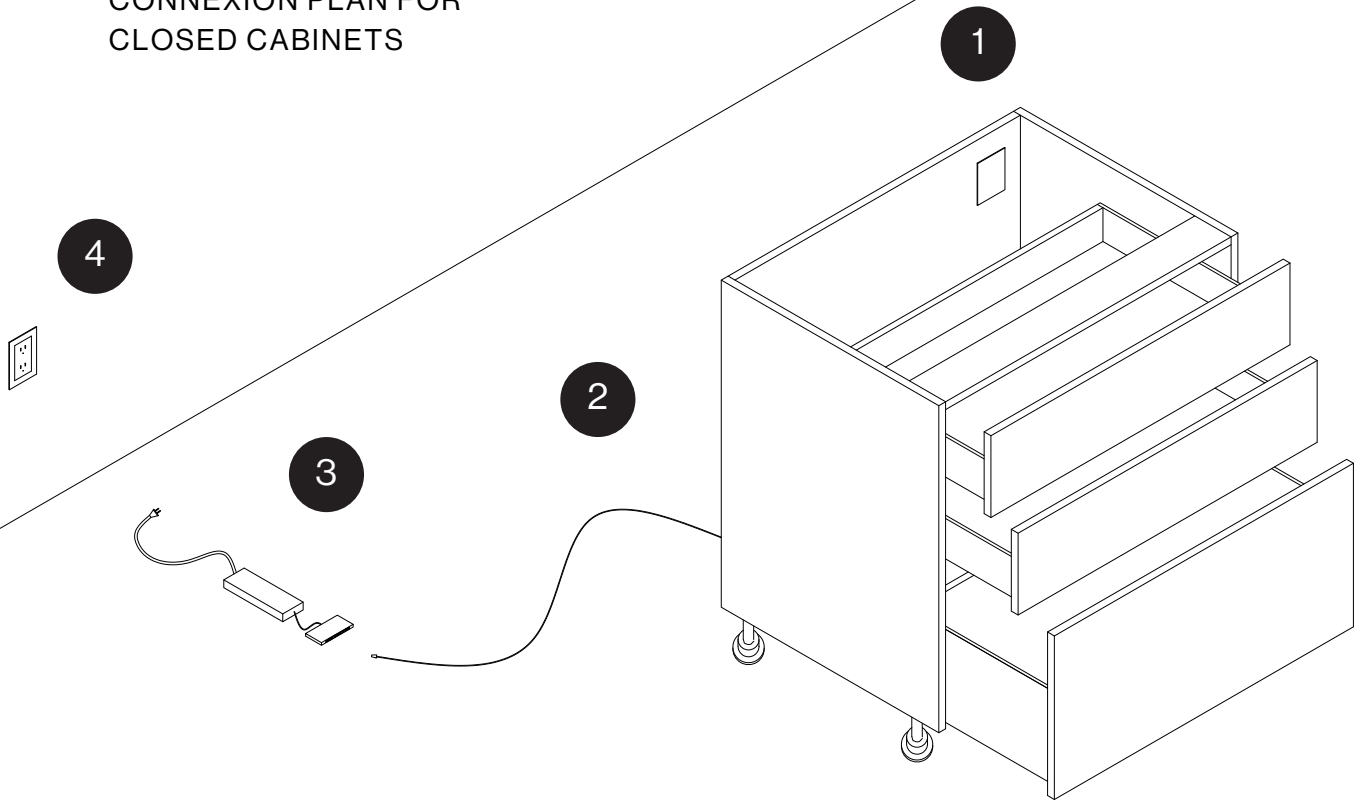

- Placement inside the cabinet: A slim LED light strip is recessed 1.27 cm (1/2 ") from the front of the cabinet on a rail to illuminate the inside of the drawer.
- Beam shape: Linear and uniform lighting.
- Control: The light gradually turns on when the drawer is opened. The sensor is positioned to the right of the cabinet.

# Luminescence

## CONNEXION PLAN FOR CLOSED CABINETS

1

It is a cap that conceals the Luminescence electronic components. It allows for replacements in case of defects.

2

Each cabinet is equipped with a single 2-meter (78") wire with a connector at its end.

3

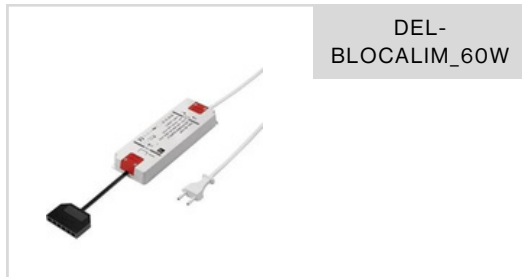

Closed cabinets must be powered by a direct current transformer. Each transformer has a capacity of 60 watts and can accommodate up to 9 connectors.

4

The transformer must be connected to a 110-volt power outlet at a location of your choice, in accordance with the electrical code applicable in your region.

# Luminescence

## ELEMENTS TO ADD IN YOUR LUMINESCENCE ORDERS

This is the transformer you will need for the lighting inside closed cabinets. It has a capacity of 60 watts and can connect up to 9 connectors.

You will need this transformer for all lighting activated by a wall switch. It is suitable for use in glass and open cabinets as well as with Luminescence panels. With a capacity of 50 watts, it can connect up to 16 connectors.

This item allows you to increase the number of connectors that can be connected to a transformer. It is important to ensure that the transformer's wattage capacity is not exceeded.

This is an extension cord that you can use if your transformer is more than 2 meters away from the cabinet.

2 lengths available:

- 1.8 m (70") | Code: DEL-EXT-1800
- 5 m (196") | Code: DEL-EXT-5000

## CONNECTION ZONES

### ZONE 1

ZONE CONNECTED TO  
A DIRECT CURRENT TRANSFORMER

**Applicable on :**

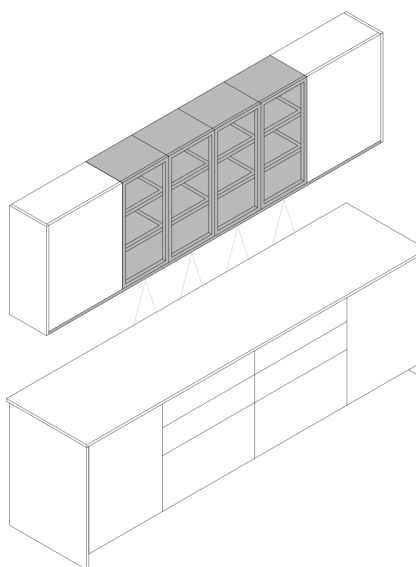

- Upper cabinets
- Lower cabinets
- Storage cabinets

**Transfo to order:**

Code : DEL-BlocAlim\_60W

### ZONE 2

ZONE CONNECTED TO  
A DIMMABLE TRANSFORMER ACTIVATED BY A  
WALL SWITCH

**Applicable on :**

- Caissons vitré
- Caissons ouvert
- Panneaux avec rondelles lumineuses
- Panneaux avec bande lumineuse

**Transfo to order :**

Code : DEL-BlocAlimVar\_50W

It is important to visually inspect your Luminescence cabinets to identify the wiring locations to avoid screwing into the wires during installation.

Grass Vionaro V8.

# GRASS Vionaro V8.

A system for all living spaces. The Vionaro V8 by GRASS offers the ideal solution for equipping kitchen, bathroom, and living room furniture with the same drawer system. The pure and elegant design of Vionaro V8 unifies the various areas of the home.

## AVANTAGES

- Increased durability: Solid one-piece metal drawer sides.
- Visual harmony: Drawer bottom color matches that of the drawer side.
- Optimized space: Over 16% more storage with 8 mm thick walls, the slimmest on the market.
- The slimmest steel drawer on the market.

Environmental commitment: Sturdy metal drawer side designed for nearly total recyclability.

Tavinea Sorto  
Accessories.

---

# Tavinea Sorto drawer accessories

Tavinea Sorto reinvents drawer organization with its elegant and intuitive modular system, perfectly adaptable to any dimension. Slim metal profiles and refined colors come together to transform storage into a minimalist luxury experience.

## ADVANTAGES

- Flexible and customizable: Modular system tailored to drawer dimensions and kitchen tools.
- Quality frames: Contemporary design 6 mm metal profiles.
- Visual harmony: Matching colors for a minimalist and elegant effect.
- Simple: Two frames and a divider to create custom compartments, regardless of the drawer width.

## CORNER CABINET STORAGE

### Lemans 2 - Swiveling shelf system

- For cabinet: BBC-F - Dead corner base
- Opening: Right or left
- Capacity: 25 kg / 55 lb.
- Finish: Anthracite gray

Advantages:

- Complete set easy to order, including hardware, post, and two shelves.
- Basket bottoms in anti-slip coated melamine.
- Full shelf extension with an 85-degree door opening to avoid collisions with adjacent cabinets or appliances.
- Height-adjustable shelves.
- Independent opening of shelves.

Limits	450 mm	500 mm	600 mm
